

Project Update: The Residence At Five Corners - Easton, MA

WORK PROGRESSES ON THE RESIDENCE AT FIVE CORNERS ASSISTED LIVING PROJECT

Construction on The Residence at Five Corners senior living community is underway at 678 Depot Street in the heart of Easton, MA. Congress Building Corp. is providing Construction Management services to its valued repeat client, LCB Senior Living, LLC of Norwood, MA, the facility's owner/operator.

A construction milestone was reached when crews put the final steel beam into place in the building's framework recently. According to Peter C. Nicholson, Congress' Senior Project Manager, "We have completed the steel structure and the concrete work. Our framers have mobilized and framing is well underway on the roof, exterior wall and interior partition layouts. The next step is to close in the building and start the interior frame and MEP rough-in. Things are moving along very well and right on schedule. Our project team, the owner, architect and contractor are collaborating extremely well and our experience together as we refine our building program with LCB and TAT is paying dividends at the Easton project."
